CLINICAL MANAGEMENT SYSTEM

About Us

- Thangam Info Tech is a leading technology solutions provider delivering innovative and secure software services.
- We offer scalable and customized IT solutions tailored to modern business needs.
- Our solutions help organizations streamline operations and improve efficiency.
- We focus on quality, reliability, and customer satisfaction in every project.
- Our mission is to empower businesses with smart technology for long-term success.

DASHBOARD

- Provides a real-time dashboard with quick access to appointments, patients, doctors, and performance alerts for efficient daily operations.

MASTER

- Manage core system settings with tools for smooth patient flow and efficient appointment control. Simplifies token handling and doctor schedule management

REGISTRATION

- Capture and manage complete patient, employee, and referral doctor information with accuracy. Enables quick search and seamless record maintenance for faster operations.

APPOINTMENT

- Schedule, confirm, and manage appointments with intelligent doctor assignment and flexible slot management. Ensures organized patient flow with vital sign recording before consultation.

DOCTOR'S

- Empowers doctors with instant access to daily schedules, patient history, prescriptions, and test orders. Enhances clinical efficiency with quick decision-making tools.

BILLING

- Simplifies billing and fee management with accurate consultation and service charge handling. Provides transparent and efficient financial processing for patients and staff.

PHARMACY

- Streamlines medicine management with complete stock, pricing, and prescription tracking. Ensures accurate dispensing and full visibility of patient medication history.

LAB

- Manages laboratory operations from test creation to result reporting with precision. Enables fast tracking of patient test history and completion status.

REPORTS

- Delivers powerful financial and clinical reports for informed decision-making. Tracks referrals, appointments, and revenue with clear daily and monthly insights.

ROLE ACCESS

- Enable secure, role-driven access with customized permissions that safeguard patient data, enhance privacy, and optimize workflow efficiency across your clinical operations.
